

QwicksApp API Integration Guide

1. Simple Overview & Purpose

This document explains how the **QwicksApp Mobile Application** communicates with **Skywin POS**. The integration acts as a real-time bridge between physical store inventory and online customer orders.

Feature	How it Works
1. Live Inventory Sync	QwicksApp pulls live product data, pricing, stock levels, HSN codes, and GST rates.
2. Checkout Stock Check	Before a customer pays, QwicksApp checks live database stock to verify item availability.
3. Order Webhook Ingestion	Completed QwicksApp orders automatically create retail bills and deduct stock in POS.

2. API Key & Endpoint Credentials

All incoming API requests from QwicksApp must include the secret API key in the HTTP header **x-api-key**.

Parameter	Value
Header Name	x-api-key
Default API Key	skywin_qwicks_api_key_7596
Merchant ID	skywin
Live Domain Endpoint	https://skywin.qwicksapp.com
Live Server Direct IP	http://187.127.216.26

3. Endpoint 1: Live Inventory Pull

URL: https://skywin.qwicksapp.com/api/qwicks/inventory (Method: GET)

Returns all active products formatted to QwicksApp specifications.

Terminal Test Command (cURL):

```
curl -H "x-api-key: skywin_qwicks_api_key_7596" https://skywin.qwicksapp.com/api/qwicks/inventory
```

Sample Response JSON:

```
{ "merchantId": "skywin", "totalProducts": 1015, "replaceExistingImages": false, "products": [ {
  "productCode": "10001081", "fullName": "WAR 250 GM", "shortName": "WAR 250 GM", "salePrice":
  336.46, "mrp": 1110, "stock": 720, "categoryName": "RATNAKAR", "barCode": "10001081", "hsn":
  "38089910", "taxPercentage": 18, "isActive": true } ] }
```

4. Endpoint 2: Checkout Stock Validation (stockCheck)

URL: https://skywin.qwicksapp.com/api/qwicks/stock-check (Method: POST)

Called by QwicksApp when a customer proceeds to checkout.

Terminal Test Command (cURL - 1 Line Copy & Paste):

```
curl -X POST https://skywin.qwicksapp.com/api/qwicks/stock-check -H "Content-Type: application/json" -H "x-api-key: skywin_qwicks_api_key_7596" -d '{"merchantId":"skywin","requestId":"stk_101","items":[{"productCode":"10001081","requestedQty":2}]}'
```

Response JSON:

```
{ "success": true, "merchantId": "skywin", "requestId": "stk_101", "canPlaceOrder": true, "results": [ { "productCode": "10001081", "availableQty": 720, "isAvailable": true } ] }
```

5. Endpoint 3: Order Ingestion Webhook (orderPush)

URL: https://skywin.qwicksapp.com/api/qwicks/order-placed (Method: POST)

Posts customer order details to automatically generate a retail bill and deduct stock in POS.

Terminal Test Command (cURL - 1 Line Copy & Paste):

```
curl -X POST https://skywin.qwicksapp.com/api/qwicks/order-placed -H "Content-Type: application/json" -H "x-api-key: skywin_qwicks_api_key_7596" -d '{"eventType":"order_placed","orderId":"DEL-01","customer":{"name":"Ramesh","phone":"9942499929"},"items":[{"productCode":"10001081","qty":1,"unitPrice":336.46}]}'
```

Response JSON:

```
{ "success": true, "orderId": "DEL-01", "saleId": 145, "message": "Order successfully ingested into Skywin POS" }
```
