

Skywin Billing - Test Guide

Four features: return notice, product name, invoice QR, e-Way

19 Aug 2026 Live site: <https://skywin.qwicksapp.com/>

Log in first. After any server rebuild, hard-refresh (Cmd+Shift+R on Mac, Ctrl+Shift+R on Windows) so you are not looking at an old cached page.

Test on <https://skywin.qwicksapp.com/> Close the old PDF tab; this file replaces the overflowing one.

1. Return / exchange notice on sales invoices

Sales tax invoices (retail and wholesale, A5/A4/A3) show a bold line in Declaration at the bottom left. Purchase orders and quotations do not use this template, so they must not show that line.

1. Open Sale Book: <https://skywin.qwicksapp.com/invoices>
2. Open any retail invoice.
3. Scroll to Declaration (bottom-left of the bill).
4. First line must be bold: Sold items cannot be returned or exchanged. Next line is: We declare that this invoice shows the actual price of the goods described...
5. Click Print Invoice. Check A5, then A4 (A3 if you use it).
6. Repeat on a wholesale invoice, including a long bill if you have one.
7. Open a purchase order print and a quotation print. The bold no-return line must not appear.

Pass: bold sentence on every sales tax invoice print; missing on PO and quotation.

Fail: line missing, not bold, or it appears on PO/quotation.

2. Editable product name

On Products, pencil-edit now includes the Name field. SKU stays read-only. HSN is still required. If Settings has inventory admin PIN turned on, save asks for Supervisor/Admin PIN. If that setting is off, save does not ask for a PIN.

Important: invoices reprint the current product master name. Changing a name updates future prints of old bills for that product. Only custom (non-catalog) lines keep a stored name.

1. Open Products: <https://skywin.qwicksapp.com/products>
2. Click the pencil on one product. Name becomes a text box. SKU does not.
3. Change the name slightly. Keep HSN filled. Click the green check.
4. If a PIN prompt appears, enter Supervisor/Admin PIN. If no prompt, PIN is disabled in settings - that is still a pass.
5. The list should show the new name after save/refresh.
6. Re-open an old invoice that used this product. The printed name will be the NEW master name (live lookup). Change the name back if this is live stock.

Pass: name editable; SKU not editable; HSN still required; PIN only if that setting is on.

Fail: name cannot be edited, or SKU becomes editable.

3. e-Invoice QR at the top of the tax invoice

Every tax invoice header has a QR labelled e-Invoice, to the right of TAX INVOICE. It is in the header so long wholesale bills do not clip it. It is a local scan of the bill, not a GST-portal IRN QR. The GST e-invoice app will not accept it as a legal IRN.

Scan payload (JSON): invoiceNo, date (IST), sellerGstin, buyerGstin (blank if none), grandTotal.

1. Open any sales invoice (retail and wholesale).
2. Top of the bill, right of TAX INVOICE: QR plus the label e-Invoice.
3. Print A5 and A4. QR must stay on page 1 and must not be cut off.
4. On a long wholesale bill, QR is in the header, not only after the item table.
5. Scan with a phone. Values must match that invoice number, date, GSTINs, and total.

Pass: QR on retail and wholesale prints; scan matches the bill; not clipped.

Fail: QR missing, clipped, or scan does not match. Do not treat GST-app rejection as a fail.

4. e-Way fields and export only above Rs. 50,000

Rule is strictly greater than Rs. 50,000 (Rs. 50,000.01 and up). A bill of exactly Rs. 50,000 must NOT show the fields or appear in the Excel.

POS (<https://skywin.qwicksapp.com/pos>): e-Way Bill No., Vehicle No., Dispatched through, and Destination appear only when running grand total is above Rs. 50,000. Placeholder on e-Way Bill No. says Required above Rs. 50,000, but saving the bill does not block you if those boxes are left empty.

Reports Excel (<https://skywin.qwicksapp.com/reports>): E-Way Bill Export downloads Skywin-EWay-Export-{start}-to-{end}.xlsx. One row per invoice LINE (not one row per bill). Included only if the customer has a GSTIN and the invoice grand total is above Rs. 50,000. Walk-in / no GSTIN / Rs. 50,000 or less are excluded.

1. Open POS: <https://skywin.qwicksapp.com/pos>
2. Add items so grand total is Rs. 50,000 or less. e-Way / vehicle / dispatch / destination must be hidden.
3. Raise the total above Rs. 50,000. Those four fields appear.
4. Drop the total back to Rs. 50,000 or less. Fields hide again.
5. On Reports, set a date range that includes small B2B bills and bills over Rs. 50,000. Click Download E-Way Excel.
6. Open the file. Every row must have Customer GSTIN and belong to an invoice whose total is above Rs. 50,000.

Pass: POS fields toggle above Rs. 50,000; Excel is GSTIN B2B lines on invoices above Rs. 50,000.

Fail: fields always visible, never appear above Rs. 50,000, or Excel includes B2C / no-GSTIN / Rs. 50,000-or-less bills.

Checklist

- [] 1. Bold no-return line on retail + wholesale prints; not on PO/quotation
- [] 2. Product name editable; SKU not; PIN only if setting is on
- [] 3. Header QR on every tax invoice; scan matches the bill
- [] 4. e-Way POS fields and Excel only when invoice total is above Rs. 50,000 (B2B for Excel)
